

了解貓咪及其需求

GETTING TO KNOW CATS AND THEIR NEEDS

1

貓咪每天會
進食**多次小餐**
(10到16次)

Cats eat
multiple small meals
(10 to 16 a day)

2

食物
到達胃部時
沒有預消化

Food reaches
the stomach with
no pre-digestion

3

消化速度快，
未被吸收的食物
會從糞便排出

Digestion is fast
and non-absorbed food
is passed out in the
faeces in large amounts

貓咪有**30**顆鋒利的牙齒
Cats have **30** teeth,
all of which
are sharp.

貓咪的味蕾數量較少，
對味道不敏感，
無法品嚐甜味

With very few taste
buds, cats are not
specialists of taste
and **cannot taste**
sweet flavours.

唾液**沒有消化酶**
(沒有預消化的功能)
No digestive enzymes
in the saliva
(no predigestion).

貓咪一天中會進食**許多小餐**
Cats eat **many small**
meals spread throughout
the day.

貓咪的胃
含有比人類多
六倍的鹽酸

The cat's stomach
contains **six times**
more hydrochloric
acid than humans.

貓咪的小腸約**1米**長
The cat's **small**
intestine is about
1 meter long.

儘管大腸很短
(20-40厘米)，
但**消化過程非常緩慢**
(至少20小時)。
這是未消化食物發酵
的地方
Despite the
shortness of
the large intestine
(20-40 cm), **transit**
is very slow
(20 hours at least).
This is where
non-digested food
is fermented.
